The Safety Screwdriver when working with live wiring

5-piece screwdriver set and rack with individually tested, insulated screwdrivers as per IEC 60900. Individual testing in a water bath at 10,000 volts so as to ensure safe working at the permitted voltage of 1,000 volts.

Kraftform Plus handle for pleasant, ergonomic working that makes blisters and calluses a thing of the past.

Hard gripping zones for high working speeds whereas soft zones ensure high torque transfer.

The anti-roll feature prevents any bothersome rolling away at the workplace.

Partially Lasertip: the tip literally bites itself into the screw head and prevents any slipping.
